get enum table of location type

Request

Method	URL
POST	api.xtrip.vn/enum/location/type

Params

Type	Params	Description

Response

Status	Response

10.enum/location/purchase

get enum table of location purchase type

Request

Method	URL
POST	api.xtrip.vn/enum/location/purchase

Params

Type	Params	Description

Response

Status	Response

Glossary

Conventions

- **Client** - Client application.
- **Status** - HTTP status code of response.
- All the possible responses are listed under 'Responses' for each method. Only one of them is issued per request server.
- All response are in JSON format.
- All request parameters are mandatory unless explicitly marked as **[optional]**
- The type of values accepted for a *request* parameter are shown the the values column like this **[10|<any number>]** .The | symbol means OR. If the parameter is **[optional]**, the default value is shown in blue bold text, as **10** is written in **[10|<any number>]**.

Status Codes

All status codes are standard HTTP status codes. The below ones are used in this API.

2XX - Success of some kind

4XX - Error occurred in client's part

5XX - Error occurred in server's part

Status Code	Description
200	Successful
300	Missing apikey
301	Wrong apikey
400	Missing parameter
401	Invalid parameter
500	Server error
501	Item is not found
